

DSP AI Indicator — Frontend Page Map

Permanent reference for frontend UI/UX work. Use these names to avoid production confusion.

CRITICAL RULE

LANDING PAGE ≠ COMPANY ANALYSIS. The existing Landing Page is the approved design and must remain unchanged unless explicitly requested. The new ChatGPT-style UI/UX work applies to Company Analysis only.

CORE PRODUCT PAGES

#	Permanent name	Route	What it shows
1	LANDING PAGE	/	Main homepage + Research Bar. KEEP CURRENT DESIGN.
2	COMPANY ANALYSIS	/analysis?symbol=...	Individual-security research experience. THIS IS THE PAGE TO REDESIGN.
3	SECURITY COMPARE	/compare	Compare multiple securities.
4	PORTFOLIO	/portfolio	Portfolio / holdings / portfolio-level analysis.
5	MAIN DASHBOARD	/dashboard	Overall/institutional dashboard experience.
6	RESEARCH HUB	/research	General research workspace.
7	INSTITUTIONAL RESEARCH	/research/institutional	Institutional research workspace.
8	RESEARCH CANVAS	/research/canvas	Canvas/notebook-style research environment.
9	RESEARCH INTELLIGENCE	/research/intelligence	Research intelligence workspace.

SUPPORTING PAGES

Name	Route	What it shows
LOGIN PAGE	/login	Sign in.
SIGNUP PAGE	/signup	Account registration.
FORGOT PASSWORD	/forgot-password	Password recovery.
RESET PASSWORD	/reset-password	Set a new password.
VERIFY EMAIL	/verify-email	Email verification.
ABOUT PAGE	/about	Product/company information.
CONTACT PAGE	/contact	Contact information/form.
FAQ PAGE	/faq	Frequently asked questions.
PRICING PAGE	/pricing	Plans/pricing.
COMPANY DIRECTORY	/companies	Company/security discovery.
ADVISOR	/advisor	Advisor experience.
AI COPILOT	/copilot	AI copilot experience.
CONTROL CENTER	/control-center	System/product controls.
ADMIN PANEL	/admin	Administrative interface.
DIAGNOSTICS	/diagnostics	System/diagnostic information.

COMPANY ANALYSIS — REDESIGN TARGET

- **Route:** /analysis?symbol=...
- **Permanent name:** COMPANY ANALYSIS
- **Target:** ChatGPT-style research conversation.
- Simple, low-key interface; minimal visual noise.
- Short DSP messages → user response → DSP answer → next question.
- Research progressively builds through conversation.
- Financial evidence appears naturally instead of a dense dashboard.
- TCS is only a reference/example; implementation must work for every supported security.

- Figma should be the UI/UX source of truth before major implementation.

HARD BOUNDARIES

- **Do not redesign the Landing Page** while working on Company Analysis.
- Do not mix Company Analysis with Research Hub, Research Canvas, or Research Intelligence.
- Do not call Company Analysis the 'Result Page'.
- Do not blindly delete shared frontend components.
- Backend, APIs, AI providers, research orchestration, calculations, and security/data architecture remain separate from the UI redesign.

Simple model: LANDING PAGE → COMPANY ANALYSIS → conversational research → evidence/calculations progressively shown.
